

SUNCREST COLLEGE

For the first time in half a century, two Saskatchewan institutions have a new name, and share more than just that title. Suncrest College's rebrand has changed the way advanced education is looked at in Saskatchewan's southeast and south central, giving students not just an opportunity to stay closer to home for their schooling, but also offering specialized courses that bring the institution to a new standard. The focus of keeping students local for their schooling isn't just an offer to families during the ongoing affordability crisis -- it's also a promise to the local industries in our communities that when demands need to be met, Suncrest College can offer specialized training through corporate and credit programs to meet those demands.

Our vision moving forward past the merger between legacy Parkland College and legacy Cumberland College hasn't changed. This vision reaffirms the commitment made to those studying, working, teaching, and operating in the communities within Suncrest's service area. Our goals are based on shared values and an equal partnership that will support the local labour market and the demands of a growing Saskatchewan economy.

If you're looking to increase your knowledge or certifications, look no further than Suncrest College, which has growing course offerings tailored to the communities it serves, which includes professional firefighting training, primary care paramedic training, specialized trades like welding and power engineering, health-based courses like Medical Laboratory Assistant, Continuing Care, and Practical Nursing, along with Business, Industrial and Agriculture, Adult Education, Corporate and continuing education training, as well as offerings for students to stay home longer while they work towards University degrees.
